

Hey, I'm Tanay

I'm an Industrial Designer. I'm an eager student and I think I'll always be one. I love learning new things and exploring new sectors. I don't like to shy away from a challenge but take them head-on! I feel good design has the ability to change the world and I would surely like to be a part of that change. My interests in design include Research and Strategy, Ideation and Conceptualizing and 3D Visualization. Apart from that, I love writing. If you're interested in learning more about me or my work, simply reach out.
